

SAKET SAURABH

Machine Learning & Computer Vision Developer

Delhi, India | [linkedin.com/in/saket-saurabh-012956291](https://www.linkedin.com/in/saket-saurabh-012956291) | github.com/SAKET-SAURABH-07

EDUCATION

Guru Tegh Bahadur Institute of Technology (GTBIT), GGSIPU

2023 - 2027

Bachelor of Technology, Information Technology

Kendriya Vidyalaya (KV)

Completed 2023

Class XII: 79% | Class X: 82% | Stream: PCM + Computer Science

TECHNICAL SKILLS

Languages: Python, SQL, Kotlin, HTML, CSS, JavaScript (basic)

ML / AI Frameworks: Scikit-learn, TensorFlow, Keras, OpenCV, YOLOv8x, MobileNetV2

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Streamlit, Joblib

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Android Studio, NVIDIA Jetson Nano

Concepts: Supervised & Unsupervised Learning, Transfer Learning, Object Detection, Face Recognition, Regression, Clustering

PROJECTS

Signboard Recognition System

Jul 2025 - Sep 2025

Technologies: Python, YOLOv8x, OpenCV

- Developed a real-time traffic signboard detection system using YOLOv8x for object detection and OpenCV for image processing.
- Trained on a comprehensive road-sign dataset, achieving robust detection accuracy across diverse environmental conditions.
- Applied as an Industrial Training project; received a Letter of Recommendation from GTBIT for technical excellence.

SGPA / CGPA Predictor - ML Web Application

Jun 2025 - Jul 2025

Technologies: Python, Scikit-learn, Streamlit, Joblib

- Trained and benchmarked five regression models (Linear, Ridge, Lasso, Random Forest, SVR) on a dataset of 900+ student records.
- Selected best model by R2 score and MSE; serialised with Joblib for production deployment.
- Built an interactive Streamlit web app with sliders for instant CGPA prediction and dynamic peer-comparison charts.

Indian Currency Detection System

2024

Technologies: Python, TensorFlow, MobileNetV2, OpenCV, TTS

- Implemented MobileNetV2 transfer learning pipeline for real-time Indian currency note classification via live webcam feed.
- Integrated Text-to-Speech (TTS) output for accessibility, processing OpenCV video frames end-to-end.

Face Recognition Attendance System

2024

Technologies: Python, OpenCV, face_recognition

- Built an automated attendance system using real-time face detection and recognition from webcam input.

CERTIFICATIONS

IBM SkillsBuild - Decoding Data: Insights and Impact through Analytics

Jun 2025

Credential ID: IBM25PBL3396

NVIDIA - Getting Started with AI on Jetson Nano

Aug 2025

Unstop - 30 Days DSA Bootcamp

Aug 2025

HackerRank - SQL Advanced

Dec 2024

HackerRank - Software Engineer [Intern Eligible]

Jul 2024

Microsoft & LinkedIn - Career Essentials in Software Development

Jun 2024

Cuvette - Generative AI (ChatGPT)

Apr 2025

Google - Developer Program Certification

—

ACHIEVEMENTS

- Received a Letter of Recommendation from GTBIT for exceptional performance on the Signboard Recognition System (Oct 2025).
- Completed IBM SkillsBuild Project-Based Learning in Data Analytics with CSRBOX (2025).
- Completed NVIDIA edge AI certification: Getting Started with AI on Jetson Nano (2025).
